NICE PLUG-IN MULTIDECK CABINET

The Nice is a multideck chiller offering fantastic merchandising opportunities. The ultra low front design, larger merchandising window and 450mm deep shelves give an increased capacity over many of the competitor's models.

As standard the Nice has all the features a retailer would need - EPOS strips, adjustable shelves, canopy lighting and the option to multiplex cases together.

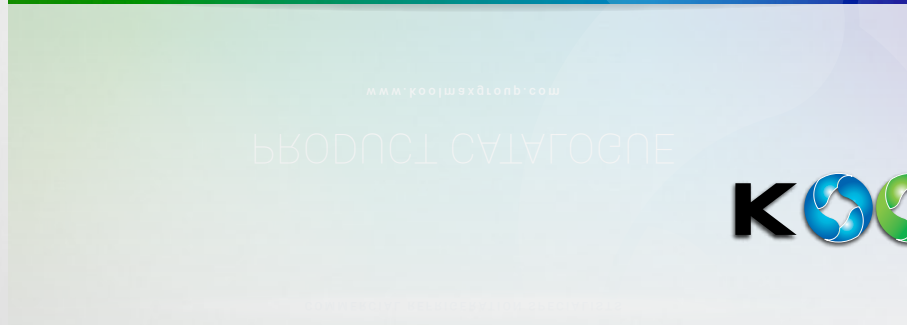

FEATURES

- Slow rise night light
- Digital controller
- Base + 5 adjustable shelves
- EPOS strips
- LED lighting
- Optional extras: Undershelf lighting, additional shelves & energy efficient fans
- 2170 tall version available
- Solenoid included
- Expansion Valve included
- Mirror or panoramic end walls

SPECIFICATION

Dimensions (WxHxD)	1250 x 745 x 2020
Merchandising Area (m ²)	1.95
Temperature Range (°C)	-1°C to +7°C (M2) or -1°C to 5°C (SM1)
Refrigerant	R449a
End Wall Thickness	40mm
Shelf Depth (mm)	450mm
Duty Rating	1200W/Metre @ -8

The image also includes a 3D rendering of the cabinet, a technical drawing with dimensions (1250mm height, 745mm width, 2020mm depth), and three circular icons representing features: a lightbulb, a shelf, and a digital display.

A faded, semi-transparent version of the product page for the Nice Plug-in Multideck Cabinet, mirroring the design of the top-right image.

Specialist cables and electrical wires for industrial and domestic use

Introduction

The business was founded by our team in Australia. Originating from a proven and successful background in the Solar industry, they found that cable quality was inconsistent from shipment and purchased from their existing suppliers.

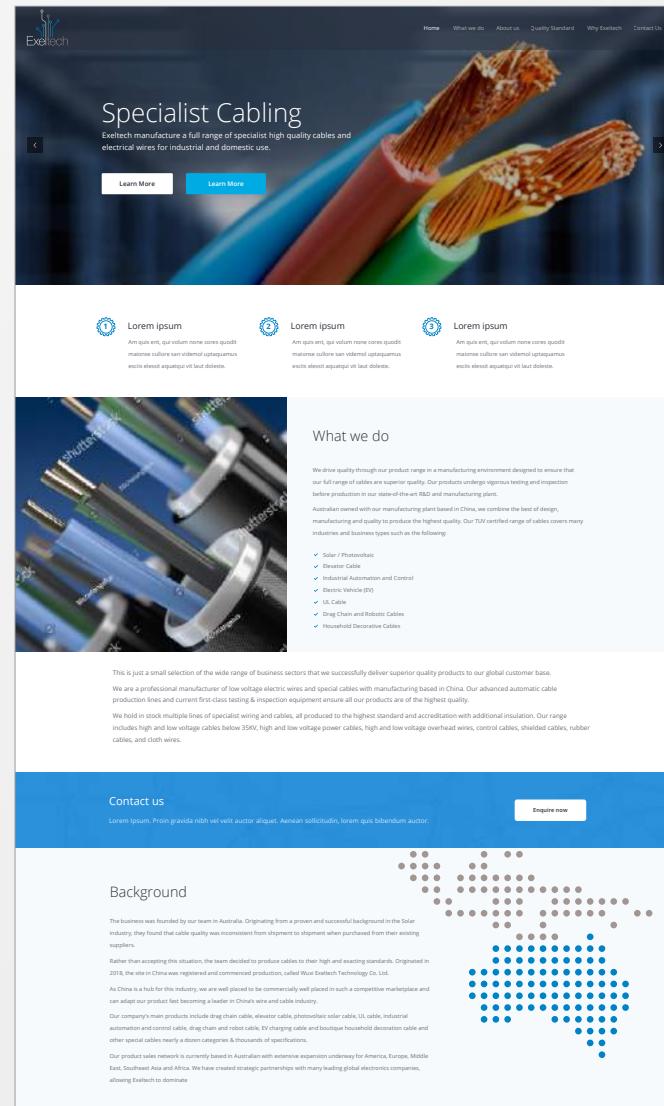

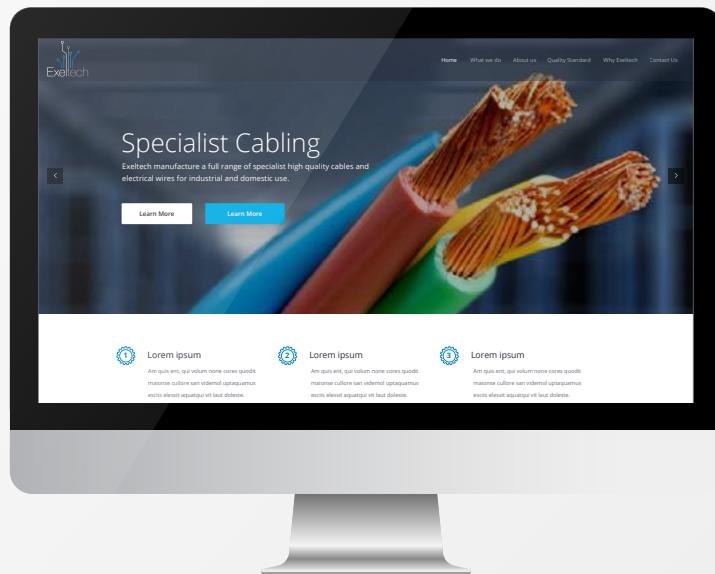

Our company's main products include drag chain cable, elevator cable, photovoltaic solar cable, UL cable, industrial automation and control cable, drag chain and EV charging cable. We also offer other special cables in many categories & specifications.

Our product sales network is currently based in Australia with extensive expansion underway for America, Europe, Middle East, Southeast Asia and Africa. We have created strategic partnerships with many leading global electronics companies, allowing Exeltech to dominate.

Website layout

ULTRA EFFICIENT INSULATED PLASTERBOARDS

PERFORMANCE INSULATION

Ultra Liner Insulated Plasterboard is a high performance laminated board for insulating walls and ceilings. The product consists of a 12.5mm tapered edged plasterboard factory bonded to rigid polyisocyanurate (PIR). The insulation is faced with foil for mechanical fixings. We do not recommend or provide a product which can be fitted using dry wall adhesive. In order to achieve the required U values, the insulation is available in a large range of thicknesses and the board is also available in a 'handy' 900mm x 1200mm size for use in lofts and confined spaces.

Unrivalled Product Range
In addition to PIR insulation Ultra Liner board is available with several alternative insulation materials dependent upon application.

Ultra Liner Ref	Application
PIR/MF	Foil backed PIR for mechanical fix
PIR/MF/Handi	Foilbacked PIR for use in confined spaces

Installation and Site Handling

Walls - Mechanical Fix
Ultra Liner board should be fixed to vertical battens at maximum 600mm centres and horizontal battens supporting the top and bottom edges of the boards. Window and door openings should be trimmed with battens to support the edges of the board. Ultra Liner boards must be pre-treated and at least 40mm wide joists must be used to support the boards. The boards should be fixed using screws long enough to allow a 25mm bite into the batten and the screws need to be at 150mm centres at least, 15mm away from the edge of the board. When the boards meet at corners the insulation should be cut back to ensure the plasterboard fully envelopes the insulation.

INTRODUCTION TO NUAIRE WHO ARE WE?

VALUES AND VISION

What we stand for and expect

- Reputation
- Quality
- Delivery
- Sustainability
- Profitability
- Client Satisfaction
- Innovation

What we are trying to achieve

To be an integral part of our client's business with engaged people who really care about the impact we're making with these clients that create sustainable profits for everyone involved.

INTRODUCTION TO NUAIRE WHO ARE WE?

THE ECO MARKET

- Obligations have been in operation of this nature since 1994
- In 2012 these obligations were 80 times what they were when it first started
- By 2022 obligations are even higher running at £1billion per annum
- These are the largest Government imposed programmes to bring about energy efficiency and to delivery Fuel Poverty across the UK
- Fuel Poverty is where a household spend more than 10% of net income heating and lighting their home
- Fuel Poverty figures remain static despite the increase in investment
- Our ability to achieve Net Zero by 2050 is predicated on the 37% emissions from domestic properties being reduced significantly through programmes of deep retrofit

In 2021, all delivery of these programmes must be carried out to PAS2030:2019 standards which now includes PAS3035.

1994 - 1998: EESoP (Energy Efficiency Standards of Performance)
 1998 - 2002: EESoP 2 & 3
 2002 - 2005: EEC 1 (Energy Efficiency Commitment)
 2005 - 2008: EEC 2
 2008 - 2012: CERT (Carbon Emissions Reduction Target)
 2009 - 2012: CESP (Community Energy Saving programme)
 2013 - 2015: ECO 1 (Energy Company Obligation)
 2015 - 2017: ECO 2
 2018 - 2021: ECO 3
 2022 - 2028: ECO 4

EACH OF THE COVERS LAID SIDE BY SIDE

There is a solar solution for everyone.

Options

Buy
Pay for the system and installation in full.

Finance
Arrange a loan for part or all of the system.

Free*
System installed free of charge.

Did you know?
It doesn't have to be sunny for Solar PV to work. It only needs daylight to generate free electricity.

There's a solar solution for everyone

The Energy Alliance is a national brand delivering local service throughout the UK, using our own in-house installers. We offer impartial advice about energy saving and generating services and technologies for the home and business.

What You Get

- Bulk buying prices
- Great service
- Protection from 'cowboy' operators
- Recommendations that are best for you

How you benefit

According to the Energy Saving Trust, a Photovoltaic system will only take between 8 to 12 years to pay back. So as well as adding value to your home you'll benefit from the following...

ELT
The Feed-in Tariff (FIT) is a government initiative where you will receive a payment for each kWh of 'green' electricity you produce. Also known as the 'Clean Energy Cash Back Scheme'.

Sell
Any electricity you generate that don't use can be sold back to your energy supplier at the current rate of 90.03p per kWh.

Save
By generating your own electricity, you will need to buy less from your energy supplier, so you save on your electricity bill as well.

How It Works

- 1 PV array is installed in the best location to maximise the power output, typically on the roof of the property.
- 2 The Direct Current (DC) generated by the array is converted to Alternating Current (AC) by an inverter before it can be used.
- 3 A new export meter shows the net electricity exported or imported to or from the grid.
- 4 You use your electricity as before but any excess that you produce can be sold back to the grid.
- 5 The AC that has been generated is connected into your main distribution box.

We Offer

• No Feed-in Tariff
• Leasing your roof for 25 yrs

• Sell
• Save

• Feed-in Tariff
• Sell
• Save
• Limited personal capital investment

• Loan repayments will reduce your ROI

• Pay on completion only

• Bulk buying prices
• Great service
• Protection from 'cowboy' operators
• Recommendations that are best for you

Did you know?
The average UK household could benefit from approximately £1,000 a year TAX FREE using solar power.

Did you know?
The average commercial installation could benefit from approximately £3,500 a year TAX FREE using solar power.

Another stunning development by the award winning prestigious local house builder Hurstwood Developments, the secure gated development Riverbank Mews composed of six residential converted properties – four 3 storey mews style properties and two semi detached homes.

The unrivalled quality of the Riverbank Mews properties is evident, a benchmark to homes in the Rossendale Valley. With over 30 years of building prestigious estates in quality luxury and finish to produce superior family homes within an area which is to be proud.

As it's the finishing touches that turn quality houses into individual homes, we cater for your every aspect of your interior design programme which means you get the chance to design bathrooms right down to the colour scheme of the woodwork.

The six luxurious stone built properties reflect the traditional architecture whilst offering spacious four and five bedrooms accommodation with a wealth of living space opening onto private gardens and balconies, perfect to enjoy the beautiful countryside vistas.

Located in the picturesque village exclusive riverside development is on the doorstep of outstanding open spaces. Ideally situated close to the market of Colne/Harwood, Riverbank Mews is transport (buses, retail outlets, restaurants, motorway links) are also nearby allowing Manchester (30 mins), Preston (20 mins) and Blackburn (15 mins).

With Riverbank Mews, you're not just buying a home... a legacy for future generations.

VAN LIFE LA WAS FOUNDED ON THE IDEA THAT HAPPINESS IS ONLY REAL WHEN SHARED...

Something about driving a VW is different again than when you're behind the California coast just back in 1967. The thrill of it is really how timeless the sense of freedom has been. And now, what the freedom of having a California lifestyle on your side is what really gives you the extra excitement for the road, and that is where Van Life LA comes in.

My entire life has had a healthy obsession with classic cars, but the VW has always been on the top of my list. Growing up with parents, grandparents, and cousins who always had cars, I decided that I would like to be the next generation of people who love cars. I decided that I would like to be the next generation of people who love cars. I decided that I would like to be the next generation of people who love cars.

Whether you're local or from out of town, your VW lives in a Van Life LA with you. You'll have a van that's ready to go, with everything you need to make your trip a success. You'll have a van that's ready to go, with everything you need to make your trip a success. You'll have a van that's ready to go, with everything you need to make your trip a success.

-Clara Heller, Founder of Van Life LA
